

CURRICULUM VITAE

Artu Kalervo Rajantie

<https://www.imperial.ac.uk/people/a.rajantie>

ORCID: <https://orcid.org/0000-0002-6406-4412>

1. Basic Information

Employment:

2013 –	Professor of Theoretical Physics, Imperial College London
2008 – 2013	Reader in Theoretical Physics, Imperial College London
2005 – 2008	Lecturer in Theoretical Physics, Imperial College London
2002 – 2005	Junior Research Fellow, Churchill College, University of Cambridge
2000 – 2003	Postdoctoral Research Associate, University of Cambridge
1998 – 2000	Postdoctoral Research Associate, University of Sussex
1998	Researcher, Helsinki Institute of Physics
1995 – 1997	Research Assistant, University of Helsinki

Education:

2008	Certificate of Advanced Study in Learning and Teaching, Imperial College London, UK
1997	PhD in Theoretical Physics, University of Helsinki
1996	MSc in Theoretical Physics, University of Helsinki
1995	BSc in Theoretical Physics, University of Helsinki

Memberships of Scientific Societies:

- Fellow of Institute of Physics (UK)
- Fellow of the Royal Astronomical Society (UK)
- Fellow of Higher Education Academy (UK)
- Member of Finnish Physical Society (Finland)

2. External Roles

Expert positions:

- Member, [STFC Particle Physics Advisory Panel](#) (from 2022)
- External Examiner for Physics Undergraduate Programmes, Swansea University (from 2022)
- Member, [STFC DiRAC Project Management Board](#) (from 2021)
- Member, STFC DiRAC Data Intensive Service Management Board (from 2018)
- Member, Royal Society Research Appointments Panel A(iii) (2017-2022)
- Member, Norwegian Centres of Excellence Phase 1 Selection Panel (2021)
- External Peer, Faculty of Natural and Mathematical Sciences, King's College London (2015-2019)
- Member of STFC Computing Advisory Panel (2014-2019)
- Chair, Expert Assessment Panel for Assistant Professorship, University of Stavanger, Norway (2018)
- Member, STFC Particle Theory Review Panel (2017-2018)
- External Examiner for Physics Undergraduate and MSc Programmes, University of Sussex (2013-2017)
- External Examiner for Physics Undergraduate and MSc Programmes, King's College London (2010-2014)
- Docent in Theoretical Physics, University of Helsinki (from 2003)
- Research student examiner for several universities in the UK and elsewhere
- Referee for several funding agencies, promotion panels, journals and book publishers
- Recognised as an “Outstanding Referee” by American Physical Society in 2012

Outreach:

- Chairman and lead organiser, [Finnish Science 100](#) Symposium, Imperial College London, 4 November 2017
- Lead exhibitor of the *Monopole Quest* exhibit at the Royal Society Summer Science Exhibition 2015
- Member of the Organising Committee, *Salam+50*, 7 July 2007, Imperial College London (One-day event of public talks celebrating Nobel Laureate Abdus Salam’s legacy)
- Given 44 public talks in several countries, talks to primary and secondary school pupils, and participated in many outreach events including *I'm a Scientist, Get me out of here!*, *Pint of Science*, *Science Uncovered*, *Worldcon 75*
- Popular science articles in Physics Today, Contemporary Physics and Arkhimedes (Finnish Physical Society)
- Interviewed on BBC News Channel, BBC World News, YLE (Finland), BBC local radio stations. Research covered in the Sunday Times and other print and online media.

Other activities:

- Chair, [Finnish Science Society in the UK](#) (from 2017)
- Chair of Governors, [Highdown School and Sixth Form Centre](#), Reading (from 2020, governor from 2013)
- Director, Highdown Sports and Leisure Limited (from 2020)

3. Teaching

Lecturing:

- 2016 – *Unification – the Standard Model*, MSc and 4th year UG, Imperial College
- 2006 – 2015 *Advanced Quantum Field Theory*, MSc, Imperial College
- 2011 – 2014 *Advanced Classical Physics*, 3rd year UG, Imperial College
- 2006 – 2010 *Statistical Physics*, 2nd year UG, Imperial College
- 2003 – 2004 *Cosmology*, Part III Mathematics (PG), University of Cambridge
- 1999 – 2000 *General Relativity*, 4th year UG, University of Sussex
- 1997 – 1998 *Analytical Mechanics*, 2nd year UG, University of Helsinki

Other teaching:

- Supervised 44 Masters dissertations
- Extensive experience of tutorials and small-group teaching

Administration:

- Admissions Tutor for Physics undergraduate programmes (from 2020)
- Member of departmental Teaching Committee (2010 – 2013, from 2020)
- Member of the departmental Equality, Diversity and Inclusion Committee (2020 – 2023)
- Member of the Undergraduate Admissions Panel (2017 – 2020)
- Admissions Tutor for MSc in Quantum Fields and Fundamental Forces (2007 – 2020)
- Member of departmental Academic Promotions Panel (2015 – 2017)
- Member of departmental Course Review Panel (2010 – 2013)

4. Research

The overall theme of my research is the *application of particle physics theories to cosmology*. By exploiting theoretical connections between particle physics and cosmology, and new data from experiments such as the Large Hadron Collider at CERN and cosmological observations, we can learn about fundamental physics at energies far beyond the reach of particle accelerators and understand the beginning of the Universe better. This requires development of new, more sophisticated theoretical methods and use of high-performance computing.

The main focus of my research is on understanding the dynamics of the Higgs field in the early Universe. The Higgs field, discovered in 2012 at the LHC, is unlike any other elementary particle, and its special properties make it particularly important for cosmology. Higgs particles were produced in large numbers in the early Universe, with potentially observable consequences. It is believed that the Higgs field played a central role in the origin of ordinary, visible matter, and it may also hold the key to understanding the nature of dark matter.

I am also involved in the MoEDAL experiment at the LHC, which started operation in 2015 and is looking for magnetic monopoles and other exotic particles which may have been produced in particle collisions. In 2017, my student and I proposed a new production channel, the dual Schwinger mechanism in ultraperipheral heavy ion collisions, which allows a non-perturbative computation of the production cross section and therefore provides direct mass bounds. The results of the first experimental search based on this work were published in Nature in 2022. In addition, I am interested in similar non-equilibrium processes in other quantum systems which provide a way to do “cosmology in the laboratory” and may also have direct practical applications.

Activities:

- Council Member, [EuCAPT](#) (The European Consortium for Astroparticle Theory)
- [Institute for Particle Physics Phenomenology](#) Associateship (2019 – 21)
- Chair of Speakers’ Committee, [MoEDAL collaboration](#), LHC, CERN
- Associate Member, [LISA Collaboration](#) (Laser Interferometer Space Antenna)
- Board Member, [UK Lattice Field Theory Virtual Centre](#)
- Chair, [QUEST-DMC](#) Oversight Committee (from 2021)
- Chair, Royal Society Theo Murphy Scientific Discussion Meeting [“Higgs Cosmology”](#) (2017)
- Chair, PASCOS-07 (13th International Symposium on Particles, Strings and Cosmology) (2007)
- Involved in organisation of several international conferences
- 40 invited conference talks, 75 invited research seminars
- 99 articles published in refereed scientific journals

Research Students:

- Currently supervising two PhD students
- Supervised 10 completed PhD theses:
Manuel Donaire (finished in 2007)
Alex Chambers (finished in 2010)
David Weir (finished in 2011)
Stefano Orani (finished in 2013)
Laura Bethke (finished in 2014)
Oliver Gould (finished in 2017)
Edward Gillman (finished in 2018)
Stephen Stoprya (finished in 2018)
David Ho (finished in 2021)
Andreas Mantziris (finished in 2022)
Archie Cable (finished in 2023)
- Examiner for 23 and pre-examiner for 10 PhD candidates

Funding:

- Co-I on STFC Rolling/Consolidated grants supporting research in the Theoretical Physics Group at Imperial College (from 2005)
- PI on a Royal Society International Exchange “*Scalar field dynamics in de Sitter spacetime*” with the University of Buenos Aires (2023 – 24)
- PI on a Royal Society International Joint Project “*Non-equilibrium quantum field theory in cosmology*” with Helsinki Institute of Physics, Finland (2010 – 12)
- Co-I on PPARC grant supporting the COSMOS supercomputer (2006 – 09)
- Recognised Researcher on a PPARC Special Programme Grant “*Classical Field Theory*” (2003 – 07)

Publications:

In theoretical physics the authors are conventionally listed in alphabetical order.

Refereed papers
