

## Summary of data available for Nash's Field experiment (plots K-S)

Updated: January 2024

Catalina Estrada

- **Plot type** "all" means 4 treatments: spr.mol, ins.pel, spr.pel and ins.mol (see codes in table PLOTTYPE below)
- **Plot** "all" means 8 plots: k, l, m, n, p, q, r, s. if **Plot.type** is given then means ins.mol (k, l), spr.mol (m,q), spr.pel (s,r), ins.pel (n,p)
- **Fencing** "all" means 2 treatments: fenced and rabbit (unfenced)
- **Lime** "all" means 2 treatments: limed and unlimed
- **Herbicide** "all" means 3 treatments: control (no herbicide), min.grass (grass species removed with herbicide), min.herb (herb species removed with herbicide)
- **Nutrients** "all" means 12 treatments: no.nutr, plus.k, plus.mg, plus.n, plus.p, plus.pk, min.pk, min.k, min.mg, min.p, min.n, all.nutr (see codes in table MINTREAT below)
- Whether or not measures of bare soil cover, dead organic material biomass or cover and bryophyte biomass or cover was measure is included in columns "**bare**", "**dom**" and "**bryo**" respectively.
- **Data type**: biomass and cover mean aboveground dry biomass or percentage cover of each plant species present in a 2x2 m plot respectively. Species means presence of species in a 2x2m plot. Total biomass means dry or wet aboveground biomass of all species combined in plot.

Please refer to the metadata file for this experiment for details on treatments and data collection. File: NashKS\_metadata.pdf
